Automotive Paint Gauge

Elcometer 311

In addition to the paint thickness, the Elcometer 311 displays the key statistical values¹ used to assess the overall condition of the paint work; number of readings (n), average coating thickness (\bar{x}), the lowest paint thickness (Lo) and the Elcometer Index Value (EIV).

The Elcometer Index Value (EIV)³ provides the inspector with a single number which illustrates the vehicle's overall paint condition and establishes any previous paint work (PPW) which has been undertaken. This quantifiable number determines the extent of rework & the overall quality of the vehicle being appraised.

As each measurement is taken, the Elcometer 311 can transmit the thickness value via Bluetooth^{®1} either straight into your inspection application or into ElcoMaster[®], Elcometer's Mobile App, for instant report generation.

Robust, durable & weather resistant, the Elcometer 311 is available with a 2 year manufacturer's warranty*.
